

Hard Water Costs Hard Cash

www.scalewatcher.com

Scalewatcher could save you money by reducing scale.

If you are one of the **60%** of households in Ireland living in a hard water area scale is costing you money in extra energy and maintenance. Just one Scalewatcher fitted to the rising main will descale and protect your whole house. Existing scale is reduced and formation of new scale is prevented so you save money from the moment it is installed.

We guarantee that the Scalewatcher will work for you in accordance with our clearly stated performance guidelines. It will de-scale your existing system and prevent further hard water scale build up. If you are not satisfied with the performance of your Scalewatcher you are asked to contact us.

If we are unable to improve the performance we refund the purchase price in full. The performance guarantee is limited to a **6 month period** although we do our best to help customers beyond that time.

We sell satisfaction as well as products and are proud of Scalewatcher's **98%** success rate.

Scalewatcher is the original electronic conditioner launched over 18 years ago and remains the highest quality and most effective product of its type on the market.

Irish Independent Thursday August 25 2011

More than half a million people are drinking tap water which contains higher than permitted levels of potentially cancer-causing chemicals.

Irish Independent -- reveals that harmful bacteria, including E coli, have been found in bottled waters on sale throughout the country.
